

HOW WE CAN HELP

Neuphysio gives the gift of mobility back to those who have suffered an injury or illness. Our programs help people learn to stand and walk, become stable and fit, and overcome vertigo.

Ultimately, our patients achieve personal and physical balance, making them stronger and more confident.

CENTER OF EXCELLENCE

At Neuphysio, we have worked hard to establish ourselves as a center of excellence. Our services are built on a patient-focused philosophy that values:

- Specific treatments for individual patients
- Superb customer service
- Research and professional development
- Post-graduate certification
- Community collaboration

KNOW YOUR POTENTIAL

NEUPHYSIO

Where people learn to walk & balance again.

Move better, feel better, live better.

Neuphysio Rehabilitation and Neuphysio North are leading physiotherapy centres serving the people of London and Southwestern Ontario. We are experts in neurological rehabilitation, helping people who have suffered injuries or illness return to meaningful activities.

Our beautiful clinics are directed by professionals and supported by a caring team.

Mission: We provide a healing space where people learn to walk and balance again through progressive physical therapy.

Vision: A network of private neurorehabilitation centers supporting people across Ontario in their quest to maintain mobility and independent function.

Core Values: Exceptional Patient care, Outstanding Customer Service, Commitment to ongoing learning, Community, Academic and Research Involvement.

THE NEUPHYSIO TEAM

Neuphysio's qualified staff are highly skilled and passionate about helping others. The Neuphysio Team uses a goal-directed Neuroplasticity approach to rehabilitation, working with patients to set and achieve realistic targets as they improve their physical capabilities.

Our commitment to clinical teaching and research in collaboration with Western University keeps the Neuphysio team on the forefront of professional growth. Team members are certified in The Bobath / NDT Approach, Vestibular Rehabilitation and Concussion recovery. Collaborations with large scale rehabilitation technology providers, allow Neuphysio to bring robotic therapy, functional electrical stimulation, TGR Therapeutic Golf Rehabilitation and ADP seating, mobility and bracing programs to our clients.

Our Team Includes:

- Physiotherapists
- Registered Massage Therapists
- Osteopath
- Personal Trainers
- Rehab therapists
- Physiotherapy assistants
- Kinesiologists

We pride ourselves on working as a team to provide the best care and outcomes for the patient. At Neuphysio, people are valued, each treatment is unique and change is important.

NEUROPHYSIOTHERAPY

Neurophysiotherapy integrates learning and practice to ensure that the brain builds normal pathways after serious injury or disease. Goals are set based on a thorough assessment of physical parameters. Our programs are sport and leisure oriented, making therapy practical, engaging and rewarding.

VESTIBULAR REHABILITATION

For patients suffering from vertigo, dizziness or instability; it is all about recovering balance and orientation. Our program assesses the cause of symptoms and offers treatments including balance retraining, gait retraining, manual therapy, habituation and repositioning techniques. Through Vestibular Rehabilitation we have helped many people achieve fast and remarkable reductions of vertigo, as well as improvements in balance.

INNOVATIVE TECHNOLOGIES

Here at Neuphysio, cutting edge technologies are available to help patients reach their functional rehab goals. Robotic Exoskeletons, such as ESKO, Keego, are used for gait training and assisted walking. Myndmove, a Functional Electrical Stimulation device, is used to gain back function of the upper extremities following a neurological injury. Physiotherapists at Neuphysio are specially trained on these devices and will provide you with exceptional treatment and individualized care.

CONCUSSION MANAGEMENT

A concussion is a common form of head and brain injury, and can be caused by a direct or indirect hit to the head or body (for example, a car crash, fall or sport injury).

The team at Neuphysio have the knowledge and skills that allow them to treat each individual according to his or her unique needs. Your physiotherapist helps you return to your everyday activities appropriately. Having the resources you need to understand the symptoms and risk factors related to concussions is the first step in achieving a full recovery.

THERAPEUTIC GOLF REHABILITATION

Does your body affect your golf game? Our unique Therapeutic Golf Rehab program can help you turn your passion for golf into a powerful treatment.

With input from a physiotherapist and a golf professional, we use golf drills, stretching, cardio and balance training and other methods to address your injury and develop your technique.

TGR is a fun and effective way to improve your flexibility, coordination, strength, balance and endurance, so you can play better!
